

Smart Queue · What and why

Smart Queue fills cancelled appointments with patients who want an earlier visit. In Puerto Rico, waits can run for months, so every open slot matters.

01 · Ana today: hours of calls by hand

Meet Ana Martínez, Dr. Rivera's office assistant. Today, every cancellation means hours of calls, searching the list, and chasing replies, all by hand.

Fictional patients · Synthetic demo data

Scheduling support only, not emergency medical assessment. Urgency must be entered or confirmed by qualified staff. No AI triage.

Eligible candidates · staff review

Ranked by configured priority, then oldest request. Confirm an offer; the patient must accept before the schedule changes.

Offer recipient

José Pérez · P3 · Normal · 2026-10-04

1. **José Pérez** P3 · Normal Afternoons · 1–4 PM
2. **Elena Morales** P3 · Normal Afternoons · 1–4 PM
3. **Camila Soto** P3 · Normal Afternoons · 2–5 PM

Only matching office, provider, visit type, duration, date and full time window qualify. Existing patient or provider conflicts exclude a candidate.

04 · Its reasoning, step by step

José, Elena and Camila share priority three. José's request is the oldest, from October fourth, so he is selected. Elena is next.

09 · Dr. Rivera: fewer empty slots · separate synthetic month

For Dr. Rivera, fewer empty slots. In the only measured Puerto Rico dataset, about fifteen percent of appointments were cancelled. Smart Queue turns that lost time back into care.

10 · Why it's different in Puerto Rico

Large US systems offer this inside one big record system, in English. Local Puerto Rico tools confirm and remind; we found none that refills cancelled slots. Smart Queue is bilingual and logs every move.
