

smartqueue +

One opening. A better next step.

An AI assistant turns a cancellation
into an earlier visit for someone waiting.

A fictional story. A working, synthetic demo.
The assistant is simulated and rule-based.

María

Cancels

Ana

Office assistant

José

Waiting

Dr. Rivera

Provider

Why it matters in Puerto Rico.

TIME

“Might be in six months” for the next specialist slot

Oversight Board workforce study, Feb 2025 · interview quote

23 days to the next visit after a clinic cancels

VA primary care, AJMC 2025 · US data

MONEY

\$3,293 Medicaid spending per enrollee vs **\$10,426** in the states: about one third

MACPAC · FY2024

Federal match **55%** by statute; the temporary 76% ends Sept 30, 2027

CRS · KFF

Every refilled cancellation turns capacity already paid for into a visit.

RESOURCES

15.6% of appointments cancelled, about 1 in 6; no-shows 3.9–4.7%

CFSE FY2025-26 · only measured PR dataset

73.7% of physician offices have under 5 employees (US 54.4%): call-backs fall on one or two people

Census 2023

HEALTH

28.9% of primary-care need met in shortage areas (US **48.2%**)

HRSA via KFF · Dec 2025

40.7% of PR physicians are 65 or older

AAMC 2025

One cancellation. Several loose ends.

“Who can take this slot?
Who has replied?”

Update → Search → Call → Coordinate

Every opening is manual work today.
Ana holds the whole workflow together.

Life changes.
She cancels in her own view.

“Something came up.
I need to cancel.”

One explicit confirmation.
The time goes straight back to the office.

Fictional scenario · In the POC, María cancels from her patient view.

The right opening.
If someone tells him.

“I could come earlier...
if I knew.”

Booked for October 22. Free afternoons.
María's 2:00 PM slot would fit.

The assistant coordinates. Patients keep the decisions.

01

Detect & select

Spots the cancellation and ranks the waitlist by clear rules.

02

Offer

The best match gets an offer. Nothing moves without a yes.

03

Update & notify

Schedule and waitlist update. Ana gets a summary.

María cancels. José accepts. Ana is notified, not burdened.

Rule-based and simulated in this POC: no AI model, no network · English / Español · No account required

María cancels. The assistant picks José.

Its reasoning is the clinic’s own scheduling rule, shown step by step.

1. María confirms in her patient view

YOUR CURRENT APPOINTMENT

With Dr. Carlos Rivera.

Cancel your October 8, 2:00 PM appointment?

The time goes back to the office, and the AI assistant (simulated) offers it to a waiting patient. Fictional appointment; nothing real is cancelled.

Yes, cancel my appointment

Keep my appointment

2. The AI assistant (simulated) explains its pick

⚡

Cancellation detected

AI assistant (simulated)

Detected María Rodríguez's cancellation. The October 8 · 2:00 PM slot is open.

👥

Best match selected

AI assistant (simulated)

Selected José Pérez from 4 waiting patients.

- Availability Afternoons · 1–4 PM covers the 2:00 PM slot.
- Same priority (P3 · Normal) as Elena Morales and Camila Soto; the oldest request wins (Oct 4).
- Next in line: Elena Morales, newer request (Oct 5).
- Excluded Nicolás Díaz: Mornings · 9–11 AM does not cover 2:00 PM.

→

Offer sent

AI assistant (simulated)

Sent José Pérez a simulated in-app offer for October 8 · 2:00 PM.

Real POC captures · synthetic data. Rule-based assistant, simulated in the browser.

The assistant offers. José decides.

Why José?

- 1. Free afternoons, 1–4 PM.
- 2. P3 tie: oldest request wins (Oct 4).
- 3. Nicolás excluded: mornings only.
- 4. Elena is next in line.

José accepts with one explicit confirmation.
No message leaves the browser.

AN OPPORTUNITY TO BE SEEN SOONER

Does an earlier visit work for you?

14 days earlier

Thursday, October 8 · 2:00 PM

30-minute consultation · Isla Care, San Juan

AI assistant (simulated)

Availability Afternoons · 1–4 PM covers the 2:00 PM slot.

This is a simulated offer. Confirming updates only the fictional schedule in this browser. No real appointment or message is created.

Move your appointment to October 8 at 2:00 PM?

This moves your fictional appointment to October 8. The AI assistant (simulated) then updates the schedule and notifies the office. No real appointment is reserved.

Yes, move my appointment

Go back

You're in control. The demo changes the appointment only after your explicit confirmation.

The schedule updates itself. Ana is notified.

AI assistant (simulated)

Notification for Ana Martínez

The opening was filled without manual work. No action needed.

1. María Rodríguez cancelled her October 8 · 2:00 PM appointment with Dr. Carlos Rivera.

2. Selected José Pérez from 4 waiting patients. Availability Afternoons · 1–4 PM covers the 2:00 PM slot. Same priority (P3 · Normal) as Elena Morales and Camila Soto; the oldest request wins (Oct 4).

3. José Pérez accepted the earlier visit in the patient view.

4. Moved José Pérez to October 8 · 2:00 PM, released the October 22 · 2:00 PM appointment and updated the waitlist (4 → 3).

Real POC · Ana’s office view · no approval or undo needed

TIME	PATIENT	VISIT TYPE	STATUS
2:00 PM 30 min	JP José Pérez Just filled SQ-006	Consultation	Scheduled

Dr. Carlos Rivera’s schedule · SQ-006 · synthetic data

What it means — per office, per month and per year.

Base case: 1 physician · 20 visits a day · 240 days a year. A model, not a measurement.

HEALTH PROVIDER · OFFICE

~**15 / month** recovered visits
178 / year

~**\$1,418 / month** at Medicare 99213 (\$95.68)
\$17.0K / year

~**\$993 / month** at Plan Vital 70%
\$11.9K / year

~**7 h / month** staff phone time saved
87 h · ~\$1.1K / year

~**3 / month** doctor cancellations avoided, with a backlog
37 / year

Capitated primary care gains time, not revenue.

PATIENT

~**13 / month** patients seen about 14 days sooner
154 / year

~**2,160** patient-days earlier
per year

No calls to chase an earlier slot

Keeps the current visit until accepting

MEDICAID EFFICIENCY

Plan Vital pays primary care a capitation (**\$18 PMPM** minimum) whether or not a visit happens

Each refilled cancellation turns **already-paid capacity** into a visit

Illustrative only: if 100 per-visit offices matched the base case,
≈ **\$1.19M / year** at Plan Vital rates (100 × \$11.9K)

Range per office: **\$7.3K–\$28.5K / year** at 99213 (low–high)

Monthly = yearly ÷ 12, rounded. Rates: CFSE FY2025–26. Refill: UCSF waitlist (JMIR 2024). Reminders: Robotham, BMJ Open 2016. Prices: PR Medicare 2026; Plan Vital terms (medicaid.gov). Model: docs/wiki/no-shows-cancellations-benefit.md

WHY AI? · HONEST ABOUT WHAT RUNS TODAY

An assistant that acts. Rules today. A model later.

WORKING TODAY · SIMULATED

Rule-based assistant.

Detects, selects, offers, updates, notifies.
Every step labelled and explained.

No AI model runs in this POC. Patients still give explicit consent.

FUTURE · NOT IMPLEMENTED

Model-backed assistant.

Understand free-text EN/ES replies
and edge cases, under staff oversight.

SMART QUEUE · A CLEARER PATH TO CARE

Smart Queue — Less Waiting. Better Care.

Explore the synthetic workflow.

Help us validate it with care teams.

Next: a measured pilot, secure persistence,
and a model-backed assistant. Today's is simulated.
